

**THE DEPARTMENT OF AEROSPACE ENGINEERING AND ENGINEERING MECHANICS AT THE UNIVERSITY OF TEXAS AT AUSTIN** has a tenure-track position at the Assistant Professor level beginning September 2010 in the area of **Mechanics of Solids, Structures and Materials**. We are particularly interested in the area of **Mechanical Behavior of Materials for Extreme Environments** that encompasses light-weight structures and multi-functional materials for application in manned and unmanned air, space and underwater vehicles and structures, and materials and structures related to energy industries such as wind, solar and nuclear.

Applicants for tenure-track positions should have received, or expect to receive a doctoral degree in Engineering prior to September 2010. Successful candidates are expected to supervise graduate students, teach undergraduate and graduate courses, develop a sponsored research program, collaborate with other faculty, and be involved in service to the university and the engineering profession. Applications received by **January 31, 2010** are assured full consideration, but the search will continue until the position is filled. To apply, submit an application online at <http://www.ae.utexas.edu/facultyjobs>, only complete applications will be considered.

The University of Texas at Austin is an affirmative action, equal opportunity employer. For more information about the Department of Aerospace Engineering and Engineering Mechanics, please visit <http://www.ae.utexas.edu>. These positions have been designated as security-sensitive, and a criminal background check will be conducted on the applicants selected.
